

Vine & Branch Property Management Plans (P.M.P.)

2008 Was a Stormy Year, 9 Major Storms in 40 Days... Wow!

The majority of the '**Emergency Storm Services**' that we performed could have been prevented with an annual Vine & Branch property inspection and preventative maintenance program!

During the storms we had trees with extensive decay topple over onto houses. Removal of these trees prior to the storms would have saved thousands of dollars.

We also had trees that split, and had to be removed, which could have been preserved by the installation of cables or braces.

In effort to help you plan ahead and to help sustain the value of your outdoor living space, Vine & Branch is offering a new service - **The Vine & Branch Property Management Plan (P.M.P.)** This program provides the following:

- an annual visit to your property
- an assessment of your trees and shrubs
- a report of immediate and long term maintenance needs of your property

The information we will gather will help you to prioritize the services that your property may need. You will be able to plan ahead (at regular rates

instead of emergency rates) and get any required work done before loss or damage occurs.

Vine & Branch, Inc. believes that being proactive is the key, and assessing your property now, during the more visible dormant season, will assist you (and us) in preventing that middle of the night emergency call!

P.M.P. will save you money and worry!

Vine & Branch is starting its 32nd year in business and has just recently been voted as **Best Tree Service in Indianapolis** by Indianapolis Monthly!

We want to thank you for your support and confidence and look forward to helping you plan for the future.

If you are interested in having an evaluation of your property simply click [here](#) and fill out the form to request an appointment, we will follow up with you promptly.
